

# FRESH START POWER MIST

## STAY OPEN INK SPRAY

### Non Aerosol With A Fine Continuous Mist

Aerosols run out of propellant before all the anti skin is used. Our fine misting non aerosol allows use of all material and does not leave propellant in the air.

- Fine, even, mist in a non aerosol
- Stops ink from skinning overnight
- Reduces start-up waste
- Spray on blankets before start-up to reduce the tack for quick release
- For Webs, spray on the ink form during make ready, brings up colors
- Keeps ink open indefinitely without attacking and emulsification, allowing ink to lie down properly during start-up

#### Direction For Use:

To Keep Ink from Skinning:

Hold sprayer 8-10 inches away from ink on roller train, spray with a side-to-side motion until ink is coated.

#### Before Start-Up:

Spray a fine mist over the blanket surface. Wipe any excess off the blanket with a clean shop towel. This will ensure quick release from the blanket on start-up.

#### For Web Printers:

Spray a fine mist over the ink forms, this will bring up color and reduce waste during make-ready.

#### Specifications:

VOC content lb. / gallon	5.8
VOC content grams / liter	695/ltr
Flashpoint	-156°F
Color	Colorless
CA. Compliant	Yes

#### Available In:
